To Whom It May Concern:

We are writing to relate the wonderful experience that we have had working with the Jacqueline Hosford. Two years ago, Jacqueline designed and managed the gut renovation of our apartment in the West Village. Not only was Jacqueline a consummate professional, but her sense of humor made her great fun to work with. Her creative, inventive approach to design has given us the gift of an apartment that is both beautiful and practical. Jacqueline saw possibilities in our apartment that we had not imagined. The kitchen is now quite a marvel to behold. The apartment is a relatively small space, but we knew it could be very special. Our friends have even remarked that our apartment has a wow factor that charms one from the moment one enters. One of the reasons for that is the gallery effect Jacqueline created in the entry hall complimented by a lighting fixture that she designed.

Jacqueline is particularly adept at sourcing design elements. We have an apartment that is deco era and she found doorknobs that are very deco and really fun. She also found a fabric for our closet "doors" that evokes the era of Deco era movie palaces. Exactly the image we had given her. We have balanced the deco with a shaker style in cabinetry. Again her choices and her designs for the fire place mantles and built in shelving in our bedroom completely captured our vision. She also came up with a great design for the valance in our living room using the crown molding. We had a desire for floor to ceiling drapes to compliment the windows in the living room, one of our favorite features of the bones of the apartment, and Jacqueline's design for that is quite simply elegant.

Jacqueline's years of professional experience allowed us to enjoy the renovation of our apartment as she guided us through the design and renovation process. When anyone asks us who designed our apartment, we are eager to tell them about our fantastic experience with Jacqueline Hosford. We could gush on and on about how happy we are in our apartment and how many compliments we have received. We would be happy to speak with you further or even give you a tour of the space and show you all the design elements that we enjoy so much every day. Coming in to our apartment is a respite from the outside world and we love our home. Jacqueline listened to what we wanted and she delivered that for us.

Sincerely,

Phil Koubler
Robert Gallagher
